2. In addition to the 1954 exports shown above approximately one-half million tons were exported [redacted] This figure is included in the above figures under Domestic Consumption.
3. The figures given for coke refer to coke oven coke only. The 1954 gas coke production figure amounted to 0.6 million tons.
4. Production of metallurgical coke in 1954 was 6.75 million tons. Coke exports to Eastern Europe consist exclusively of metallurgical coke. The 1955 coke oven coke production forecast is well above 10 million tons of which

approximately 75% will be metallurgical coke. The original plan envisaged 9.9 million tons of coke of all kinds.

5. Most Polish coal shipments to the USSR are so-called "reparations" coal. Six million tons of "reparations" coal was sent in 1952. Payment, which was reimbursement for transport costs, was roughly \$2 per ton.
6. The 400,000 tons of coke exported to the USSR in 1954 were part of a deal whereby an equivalent quantity was exported by the USSR to Hungary.
7. The postwar drop in Polish exports to East Germany was compensated by imports of coal by East Germany from the USSR amounting to approximately 800,000 tons per annum.
